JOINT RESEARCH WITH BYTEDANCE

At ByteDance, we are all about sharing knowledge. The Qomolangma program is a platform to accelerate scientific output for full-time researchers and to promote collaboration and exchanges between academia and industry. As the name suggests, the Qomolangma program is designed to allow you to reach the summit of your research potential. The joint research program will allow you to:

- Receive sponsorship and funding for your research.
- Have access to our resources and vast data infrastructure to conduct cutting-edge research of any scale.
- Have the opportunity to visit our headquarters in Beijing and work together with our top researchers around the world.

RESEARCH DIRECTION ────────────

ByteDance is conducting state-of-the-art research in a broad scope of computer science and AI. We are always looking for passionate researchers to join us. We are looking for the following background:

- Be a full-time researcher at any university or research institute.
- Your field of research should be computer-science related.
- We propose that your research area is in one of the following fields:

Natural Language Processing	*Machine Learning*	*Cloud Computing*
Computer Vision	*Speech Recognition*	*Big Data Platforms*
Computer Graphics	*Distributed Systems*	*Software Engineering*

You are more than welcome to reach out to us and tell us about your current and future research projects. Write to us and tell us about yourself and your research ideas on the following email address:
